

REVISION
SKINCARE®

DISRUPTIVE INNOVATION.
TRUE VISIBLE RESULTS.™

THE SCIENCE IS BLACK & WHITE.

INTRODUCTION TO REVISION SKINCARE®

The content of this presentation is proprietary and confidential information of Revision Skincare®.
It is not intended to be distributed to any third party without the written consent of Revision Skincare®.

THE REVISION DIFFERENCE

1

a focus on
**INNOVATIVE SKINCARE
PRODUCTS**

2

**A STRONG HISTORY
of skincare innovation**

3

**we own & operate the
ENTIRE VALUE CHAIN**

4

**R&D DRIVEN
organization**

The content of this presentation is proprietary and confidential information of Revision Skincare®. It is not intended to be distributed to any third party without the written consent of Revision Skincare®.

MISSION

Every product delivers benefits patients see for themselves, whether as part of a rejuvenating regimen or an enhancement to in-office procedures.

The content of this presentation is proprietary and confidential information of Revision Skincare®. It is not intended to be distributed to any third party without the written consent of Revision Skincare®.

OUR FOCUS

DISRUPTING THE STATUS QUO

With pioneering innovation, plus our commitment to rigorous clinical testing modeled on the principles of pharmaceutical protocols, places us at the forefront of medical-grade professional skincare companies.

The content of this presentation is proprietary and confidential information of Revision Skincare®. It is not intended to be distributed to any third party without the written consent of Revision Skincare®.

PHILOSOPHY

Our superior formulation philosophy is driven by an unwavering passion to provide transformative results while promoting and protecting the microbiome and overall skin health.

WE NEVER COMPROMISE AND NEITHER SHOULD YOU.

The content of this presentation is proprietary and confidential information of Revision Skincare®. It is not intended to be distributed to any third party without the written consent of Revision Skincare®.

INNOVATIVE FORMULAS DELIVER

TRUE VISIBLE RESULTS.™

Our unique formulation philosophy transforms high-potency active ingredients into breakthrough formulas with superior efficacy that deliver transformative results while optimizing long-term skin health.

The content of this presentation is proprietary and confidential information of Revision Skincare®. It is not intended to be distributed to any third party without the written consent of Revision Skincare®.

WE HARNESS THE POWER OF HIGH-POTENCY ACTIVES

We formulate with skin-regenerating bioavailable peptides, gold-standard ingredients like THD Ascorbate, and industry-first, patented technologies like Sunflower Sprout Extract to ensure that patients see results.

WE UTILIZE MULTIPLE PATHWAYS

This ensures that repair mechanisms are activated throughout the skin for the most significant outcomes.

WE PROTECT THE MICROBIOME

We utilize pre- and postbiotic technology to support a healthy microbiome, because only when this ecosystem is in balance can it promote long-term skin health.

WE FORMULATE TO THE RIGHT PH TO SAFELY DELIVER RESULTS

The majority of our formulas have a skin-neutral pH which is optimal for skin health and for maintaining the skin barrier to protect against external aggressors.

WE OPTIMIZE WITH SYNERGY

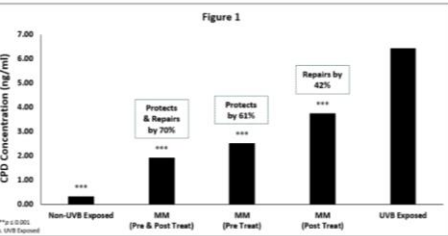

Our formulas are designed to work synergistically so the individual benefits of every product are maximized within the skin when used together, simplifying professional and patient usage.

Mineral Moisturizer SPF 50 provides DNA Protection and Repair for All Skin Tones

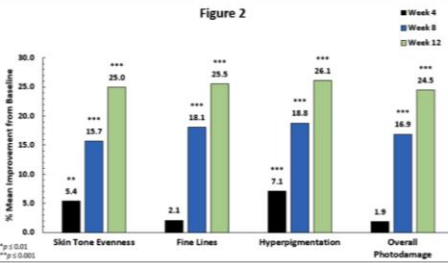

Dr. [Name], MS; Sofia Iglesia, MS; Tatiana Kononov, BS, MBA; Alisar S. Zahr, PhD

RESULTS

In Vitro
MM statistically significantly repaired and/or protected skin from UVB-induced DNA damage (CPD formation) by 42-70% compared to untreated, UVB exposed tissues (Fig. 1).

In Vivo
Thirty-four (34) female subjects 38-60 years old (mean age 51 years) completed the study. 65% and 85% of subjects were FST I-III and FST IV-VI, respectively. Clinical efficacy grades progressively improved from baseline to week 12 across all subjects (Fig. 2). Additional analyses showed results were similar between subjects with FST I-III and FST IV-VI. The MM was effective in addressing overall facial photodamage in 85% of all subjects. Fig. 3 and 4 illustrate the positive aesthetics and efficacy of the MM based on VISIA® photography. The MM and supporting products were altogether well-tolerated.

Self-assessment questionnaire responses showed the MM was well-perceived (Week 12):

- 82% of all subjects favorably agreed that "The product does not leave my skin looking shiny (oily)."
- 71% of all subjects, 73% of subjects with FST I-III, and 75% of subjects with FST IV-VI favorably agreed that "The product blends to an invisible finish on my skin."
- 74% of all subjects favorably agreed that "My skin feels protected throughout the day."

Figure 3. VISIA® Clinical Photography of MM Pre-application (A, C) and Post-application (B, D): Subject age 60, FST I (A, B) under Standard Light (right side of face) and UV Light (left side of face). Subject age 42, FST V (C, D) under Standard Light. Data on file. Results may vary.

Figure 4. VISIA® Clinical Photography, Subject age 59, FST VI (A, B) at baseline (A) and week 12 (B) under Standard Light. Subject age 38, FST II (C-F) at baseline (C, E) and week 12 (D, F) under Cross-Polarized Light (C, D) and Standard Light (E, F). Data on file. Results may vary.

CONCLUSIONS

In vitro findings showed the MM statistically significantly protects and repairs UVB-induced DNA damage in MatTek® EpiDerm tissues. Synergistic benefits were seen in the Pre & Post Treat group, where the MM was applied prior to and left on after UVB exposure, indicating the MM could be effective when applied by consumers as part of a daily skincare regimen.

When tested *in vivo* in subjects with moderate to severe overall facial photodamage and all FST's, the MM was efficacious, well-tolerated, and well-perceived over 12 weeks. The clinical photography and statistically significant improvements in skin tone evenness, fine lines, hyperpigmentation, and overall photodamage indicate that the MM can effectively address sun damaged skin across a diverse patient population when paired with a basic cleanser and moisturizer. The MM also provides a sheer, non-oily, and aesthetically-pleasing finish which promotes use of the sunscreen.

Both *in vitro* and *in vivo* results demonstrate that the MM provides excellent skin health benefits. The MM is a highly effective option for patients across a range of skin tones looking for a 100% mineral moisturizer SPF 50 that leaves a sheer finish with minimal to no white cast or shine. In addition, the MM is an anti-aging solution that offers DNA protection and repair.

C+ CORRECTING COMPLEX 30%®

WHAT IS IT?

The only Vitamin C treatment formulated with 30% pure THD Ascorbate, the highest concentration of the most superior form of Vitamin C to deliver transformative skin brightening benefits.

WHAT DOES IT DO?

- Improves skin tone evenness
- Reduces melanin production
- Protects skin from free radical damage
- Increases collagen production
- Protects from elastin damage

BENEFITS

Provides a brighter, more even toned skin while reducing the appearance of lines and wrinkles. Helps achieve overall smoother, more radiant and healthier-looking skin.

"When it comes to Vitamin C, Revision Skincare® offers the gold standard - C+ Correcting Complex 30%®! It uses THD ascorbate which is the most stable and potent form of Vitamin C. I always recommend it to my patients."

- Dr. Garrett Harper, MD

C+ CORRECTING COMPLEX 30%®

PROVEN EFFECTIVE
ON ITS OWN.
EVEN BETTER
TOGETHER.

REVOX™ LINE RELAXER

WHAT IS IT?

The only serum clinically proven to optimize neurotoxin injection results and be highly efficacious on its own, visibly reducing expression lines, fine lines and wrinkles, while improving overall skin texture.

WHAT DOES IT DO?

- It's the perfect complement to neurotoxin injections.
- Targets expression lines, including areas that are difficult to treat with neurotoxins, like under the eyes.
- Reduces the appearance of fine lines and wrinkles and improves skin texture and elasticity by stimulating natural collagen production and enhancing skin's dermal support structure.
- Visibly reduces pore size by inhibiting the release of Acetylcholine in the skin, which is known to impact sebum production.
- Rebalances skin's microbiome, which can be depleted after neurotoxin injections that use alcohol wipes to prep the skin.

BENEFITS

Helps smooth the appearance of dynamic expression lines caused by repetitive muscle contractions and reduces the appearance of static lines and wrinkles and enlarged pores, while visibly improving skin's overall texture.

D·E·J DAILY BOOSTING SERUM[®]

WHAT IS IT?

The only anti-aging serum that **boosts skin's cellular energy** and is clinically-proven to visibly improve **skin firmness, fine lines and wrinkles, radiance, texture, and tone.**

WHAT DOES IT DO?

- Patented technology amplifies energy in the mitochondria, **so skin acts like it did when it was younger.**
- Stimulates skin's natural production of **collagen and elastin.**
- Provides **comprehensive antioxidant protection** to counteract skin aging and glycation.

BENEFITS

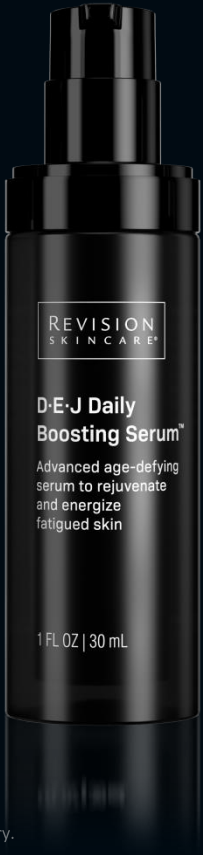

Combines **5 anti-aging benefits** in one high-performance serum, boosting skin's cellular energy and providing comprehensive antioxidant protection so skin looks, feels and acts younger.

I've been using Revision Skincare[®] D-E-J Daily Boosting Serum in my own skincare routine as the first step in my regimen. Its light texture feels wonderful and absorbs right into the skin to help elasticity, texture, and uneven skin tone.

DISCOVER THE
SCIENCE.

NECTIFIRM® ADVANCED

WHAT IS IT?

Our most advanced age-defying neck and décolletage cream with next-generation technology to combat moderate to advanced visible signs of aging.

WHAT DOES IT DO?

- Advanced firming, lifting and contouring of the neck and jawline
- Dramatically reduces the appearance of deep lines and wrinkles
- Reduces the appearance of adipose tissue and rough, crepey skin
- Brightens and evens skin tone for a more radiant glow
- Contains industry-leading Microbiome technology

BENEFITS

Comprehensive formula targets multiple signs of moderate to advanced aging for a younger-looking neck and décolletage.

“It's really hard to find products that truly address the crepey neck without using multiple products, but Nectifirm® Advanced has multiple ingredients that make it feel like 3 products in one.”

- Dr. Karan Lal

INTELLISHADE®

WHAT IS IT?

A line of 5-in-1 anti-aging tinted moisturizers with SPF that correct, protect, conceal*, brighten and hydrate skin.

WHAT DOES IT DO?

- Hydrates and moisturizes to enhance skin's natural moisture barrier
- Reduces and prevents fine lines and wrinkles
- Brightens and evens skin tone
- Protects the skin from UVA/UVB radiation and helps reduce photoaging and free radical damage
- Restores skin's youthful appearance with a sheer mineral tint*

BENEFITS

Prevents visible signs of aging and leaves the skin instantly glowing and appearing more youthful and brighter over time.

*Intellishade® Clear & Intellishade® TruPhysical Clear are 4-in-1 anti-aging untinted moisturizers that correct, protect, brighten and hydrate.

CMT POST-PROCEDURE CREAM™

WHAT IS IT?

The first patent-pending neurocosmetic clinically proven to decrease patient discomfort and downtime.

WHAT DOES IT DO?

Interrupts skin's pathways by increasing beta-endorphins to deliver relief to compromised skin while regenerating the epidermal barrier for faster recovery and improved patient experience.

- Immediately reduces thermal sensitivity and perception of heat
- Improves discomfort associated with itching, stinging, burning
- Helps replenish the skin's native microbiome for enhanced recovery

BENEFITS

Perfect to pair with Chemical Peels, Microneedling, Microdermabrasion & Thermal Lasers
